Skills

- **Frameworks / Libraries**: ReactJS, Next Js,Typescript,Redux, Tailwind CSS,Material UI, Bootstrap, NodeJS, ExpressJS
- **Technical Skills**: HTML, CSS, JavaScript, Php, Mysql, MongoDB
- **Tools & Technologies**: GIT, GitHub, VS code, WinSCP, Putty, Apache, Postman

Professional Experiences

Dehaat (Green Agrevolution Pvt Ltd.)   Jan/2024 - Present
Software Developer Intern

- Worked on various projects along cross-functional collaboration with backend engineers and product designers which are :
  Kisan-app Web & Kisan Mobile App: : Collaborated with backend engineers and product designers to develop platforms used by thousands of farmers in India. Features include an **online marketplace**, **advisory services**, **soil testing**, **farm monitoring**, **insurance**, **supply chain solutions** etc.Enabled purchases via COD and online payment modes from various Dehaat centers.
  Dehaat Honest Farms : For consumer branding platform emphasizing farmer support and Dehaat's pesticide-free products.
  DDS (Dehaat Design System) : Created reusable components for consistency across all Dehaat mobile and web applications.
- Tech stack used**: React JS,Next Js,Typescript,React Native,Context API,Tailwind CSS etc.**

Conitor Software Pvt. Ltd.   Jul/2021 - Dec/2023
Software Developer

- Designed websites of 20-30 pages and Integrated DocuSign Api for digital signatures.Implemented Payment Gateway Integration,CRUD features in Admin Dashboard by writing code in Php.
- Developed APIs for both Website and App for Video Streaming to register events, stream start, end, recording, push notifications, etc. And hand over it to the App Developer. Managed and Hosted sites in AWS

Certifications

Geekster | Geekster Coding Bootcamp

- Solved over 150 DSA Coding questions on both freecodecamp and Geekster platforms, demonstrating a strong grasp of fundamental programming concepts and problem-solving skills.
- Actively participated in multiple coding contests and practice tests, honing my coding abilities and gaining valuable experience in working under time constraints and collaborating with peers.
- Worked on various projects like **Spotify Clone, Github Finder, Emoji Finder,**

Projects

Celebrity Kenya [*Link*][Link]

- This is Website and Mobile App project. There are three types of user interactions as Celebrity, Influencer, and Fan via Chat, Audio, and Video Call from App and their data can be managed from the Website Admin Panel.
- Implemented functionality of live streaming using Ant Media Server. Developed APIs for registering events, stream start, end, recording, push notifications, Payment Gateway Integration, etc.
- Tech stack used**: Html,CSS, Bootstrap, Javascript, jQuery, Php, Mysql**

Spotify Clone [*Link*][Code]

- Developed a music player app that fetches data from the Napster API. It is built using React JS for building user interfaces, Redux for state management, React-Router for routing, and Material UI for UI components.
- It comes with feature like listen to their favourite music. For instance, users can play, pause, and repeat songs, as well as access different playlists such as song playlists, favourite songs, artist playlists, and album playlists. Moreover, the app also comes with a search functionality that enables users to search for specific songs, artists, or albums, making it easy to find and listen to their favourite tracks.
- Tech Stack: **React Js, Redux, React-Router, Material UI.**

Education

B.Tech(CSE) From I K G Punjab Technical University   **8.7 CGPA** (Jul/2016 - June/2020)
